Mobility scooters

Together we'll reach further

Life&Mobility

Together we'll reach further

Do you fancy a day out shopping with a friend? Perhaps you'd like to head out into the countryside together? Or how about a city tour? With a mobility scooter from Life & Mobility, you no longer have to miss out. Enjoy the freedom to carry on joining in and doing the things you still love to do.

Life & Mobility believes it is important that everyone should be able to keep mobile as long as they want. That's the vision that drives us! That is why we work with professionals who all share a common goal. Because we know that together we'll reach further. Product developers who understand comfortable driving and staying safe in traffic. Not to mention our dealers who understand your needs and your questions. We're very proud of this. As we are of our mobility scooters, all of which are Dutch design.

We guarantee that our mobility scooters meet the most stringent quality and safety requirements. We work with selected dealers who, like us, believe that a mobility scooter is not only a means of transport but also something that can enrich your life. Something that lets you go out with your family or friends. Our dealers are a handy point of contact for you. We work closely with them to help you get out and about and encourage you to get more out of life. **Because together we'll reach further!**

You are our core focus

Helping you maintain your sense of freedom. At Life & Mobility, this is our foremost concern when developing our mobility scooters. By listening closely to our customers, we are able to meet the various requirements that you place on a mobility scooter. Whether you want to go shopping safely or get out into the countryside in comfort, we offer a wide range of mobility scooters, each with its own characteristics and benefits. Our dealers will be happy to help you make the right choice!

Solo: superior ride comfort
Our top model with superb suspension for comfortable driving over longer distances. We can deliver the Solo fully customised to suit your requirements.

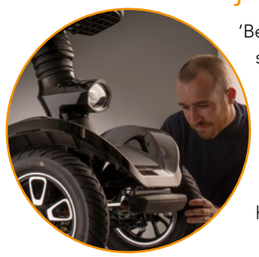
8 km/h | 28 km | INDEGO suspension system

Made in the Netherlands

It all started in 1952. That was the year Anton Beumer's company sold its first metal wheelchairs. In the years that followed, he filed several patents. And we continue his legacy of innovation to this day. Using knowledge acquired from 70 years of experience, Life & Mobility now manufactures a complete range of mobility products. We never stop asking ourselves how we can make improvements. Not only do we put this question to ourselves, but also to our network of dealers and mobility scooter users. That's why, in Doetinchem, we currently make the very best mobility scooters. We do so with a single clear intention in mind: to ensure you remain mobile for as long as possible.

'Enjoy every safe kilometer'



'Being a Product Manager, my job is to put myself in the position of the mobility scooter user. I liaise closely with my colleagues to find out exactly what is important to you. The fact that every person is different makes my job so challenging. Some people use mobility scooters for the occasional day out, whereas others rely on them for their daily shopping. Nevertheless, I have learned that there are three things that everyone considers important: safety, comfort and looks. It therefore goes without saying that we pay particular attention to these areas because that's how we can be sure you can safely enjoy every kilometer you drive.'

Chris de Niet
Product Manager

'Together we can really achieve more'

'You don't build the very best mobility scooter on your own. Our people have the required knowledge and experience, while our carefully selected dealers know exactly what you need. Like us, they are there to help you if you have a question or need support. What we supply is not just a product; it is mainly a mobility solution together with the service and support that go with it. You can count on us. Together we can really achieve more!'

Erwin Boersma
Retail Manager

'My work makes the difference'

'When you get older, you can't always take your mobility for granted. By building a mobility scooter, I can make someone's life significantly more enjoyable. Ensuring a mobility scooter perfectly matches someone's needs is so satisfying and is the reason why I enjoy going to work so much. I assemble each mobility scooter all by myself and set it up to suit the requirements of each individual user. When I've finished, my colleague performs a final inspection to check that everything is working properly. Once everything is as it should be, the mobility scooter can go to its new owner.'

Rik Giezenaar
Operations assistant

Solo

Superior ride comfort

Get to know the Solo: a top-class mobility scooter with a wide range of options and accessories that let you customise it however you want. The unique, patented INDEGO suspension system, which smoothly irons out any bumps in the road, can be set to Active, Comfort or Xtra. This makes the Solo ideal for driving long distances. The Solo is also an excellent choice for people with pain issues caused, for example, by back problems or rheumatism.

SDS SAFE DRIVING SOLUTIONS

Safety

- When cornering, your speed is automatically restricted to a safe level so you remain in full control.
- You can operate the indicators without taking your hands off the tiller. They cancel automatically after every corner.
- In the event of an emergency, you can bring the mobility scooter to an immediate halt with the emergency stop button.
- The back wheels are suspended independently of each other. Together with the unique wheel size, this creates greater stability when obstacles are encountered.

EDS ERGONOMIC DRIVING SOLUTIONS

Comfortable ride

- The seat, controls, tiller and handling can be fully adjusted to your preferences and needs.
- The patented INDEGO+ suspension (can be set to active, comfortable or extra smooth depending on your preference) and special seat suspension give you your desired driving experience.
- To minimise hand strain, you can activate the cruise control on the straights.
- Ergonomic design allows generous leg and foot room.

Features

- Available in 3-wheel and 4-wheel versions.
- Adjustable speed up to 18 kilometres per hour.
- Maximum operating range of 70 km*.
- High load capacity of 160 kg (200 kg optional)
- Height-adjustable swivel seat with suspension.
- Also available with the extra powerful Forza motor for driving in hilly areas.

** Under ideal circumstances*

Solo Blue Diamond and Solo Elegance

The special versions of our top model

Solo Blue Diamond
Let your Solo shine with the Blue Diamond look. The reliable quality of the Solo with its powerful battery and extra high level of comfort, featuring the unique blue bodywork with chic oak brown diamond-pattern seat covers, windscreen and chromed mirrors.

Solo Elegance
The Solo Elegance is the most stylish version of the Solo product range, featuring champagne-coloured covers and the same seat covers, windscreen and chromed mirrors as the Blue Diamond.

Both models are also available as three-wheelers.

Presto

Out and about with confidence

If you are looking for a safe and first-class mobility scooter with excellent driving comfort thanks to the unique INDEGO suspension system, then the Presto is the model for you. Its tight turning circle makes it ideal for both outdoor and indoor use. When it comes to the design, we have carefully considered all the safety aspects associated with using a mobility scooter. For example, the LED lights ensure you are highly visible in traffic. The clear and well thought-out control panel means you can set off effortlessly. A quick trip to the shops or just going out to see family or friends. Its beautiful and well thought-out design means you can get out and about with confidence!

SDS SAFE DRIVING SOLUTIONS

Safety

- To increase your visibility, the indicators are positioned high up and the rear lights are designed so they can also be seen from the side.
- Directional headlight with LED bulbs for better vision when cornering.
- You can keep your eyes on the road because the control buttons can be identified by touch and are positioned within thumb's reach.
- When cornering, your speed is automatically restricted to a safe level so you remain in full control.
- The indicators switch off automatically after a turn and can be operated safely without having to let go of the steering wheel.

EDS ERGONOMIC DRIVING SOLUTIONS

Comfortable ride

- Outstanding ride comfort thanks to the unique INDEGO suspension system.
- Clearly legible pictograms and information thanks to a large and well laid-out control panel.
- Optimum sitting position thanks to the multi-adjustable comfortable seat: height, depth, backrest angle, armrest height, width and seat cushion angle are fully adjustable.
- Generous leg and foot room thanks to the ergonomic design.

Features

- Adjustable speed up to 15 km/h.
- Maximum operating range of 44 km*.
- Tight turning circle of 160 cm.
- High load capacity of 160 kg.
- Removable plastic shopping basket.
- Innovative tubeless tyres with low rolling resistance.

** Under ideal circumstances*

Presto S

Slightly quicker

Do you enjoy getting up a bit more speed when you are out and about? The Presto S, the sportier and faster version of the Presto, takes that in its stride. Thanks to its tight turning circle and powerful motor, you can drive nimbly and quickly through the city or over obstacles. The Presto S is equipped with unique daytime running lights that increase your visibility in traffic. Rubber bumpers all round and ample room for your feet mean you will be relaxed when you arrive at your destination. Its sleek design with a matt and gloss black finish will certainly turn heads!

Vivo

Small in size, big in fun

Elegant, comfortable and safe; that is the Vivo. This compact travel mobility scooter can be dismantled without tools so you can take it anywhere with you. Its very tight turning circle makes the Vivo easy to manoeuvre, while its wide pneumatic tyres give it an extremely high degree of stability.

The suspension on the rear axle and the wide seat with moulded armrests provide unique comfort. And with an operating range of up to 28 km, you can relax when you are out. Embrace the freedom offered by the Vivo.

SDS SAFE DRIVING SOLUTIONS

Safety

- Large, wide pneumatic tyres and pivoting axle provide stability by keeping the wheels in full contact with the road surface.
- High ground clearance so that the Vivo can easily drive over obstacles.
- The anti-rollback braking system prevents unexpected rolling backwards down slopes.
- Adjustable speed settings so that the maximum speed can easily be geared to the surroundings.

EDS ERGONOMIC DRIVING SOLUTIONS

Comfortable ride

- Stepless tiller angle setting for an optimum sitting position.
- The seat can be adjusted in height.
- The seat has a wide, deep cushion and moulded armrests.
- The combination of a suspended rear axle and four pneumatic tyres guarantees a comfortable driving experience.
- Generous leg room thanks to the ergonomic design.
- Perfect in tight spaces, such as shops, thanks to the small turning radius.

Features

- Adjustable speed to 8 km/h.
- Maximum operating range of 28 km*.
- High load capacity of 120 kg.
- Including batteries (22 Ah) and charger (3A).
- Fitted with anti-tip wheels as standard.
- Magnetic key, with improved design.
- Plastic basket with handle, featuring quick-release, heavy-duty mounting system.
- Can be dismantled into five components for easy transportation and storage (the heaviest component weighs 20.5 kg).

** Under ideal circumstances*

Safety first

Our mobility scooters are safe and intelligently designed. This is not just an empty claim. The materials we buy are of the highest quality. We work with our product developers to come up with our Safe Driving Solutions (SDS). This is a package that comprises a range of safety features, such as increased stability and better visibility. Most of our models have four wheels, which ensure not only a comfortable ride but also excellent stability.

The Solo, Presto and Presto S are fitted with LED lights that guarantee you can see and be seen in traffic. The large and well thought-out display can easily be operated with one hand, allowing you to concentrate on the road. Our Solo comes standard with an emergency stop button to bring your mobility scooter safely to a halt while you remain in full control.

If you happen to take a corner too quickly or too sharply, then the speed correction featured on the Solo, Presto and Presto S will automatically kick in to slow you down. The indicators self-cancel after turning the corner.

Always comfortable to drive

Ensuring the user's ride is comfortable involves a great deal of thought. That is why we have our own ergotherapists and physiotherapists. These people know better than anyone how the body works. They were involved in the development of our Ergonomic Driving Solutions (EDS). A package of ergonomic solutions that ensure our mobility scooters can be fully adapted to your body. Because although a nice design is great, a comfortable ride is even more important for every mobility scooter user. The INDEGO suspension system plays a key role in ensuring a comfortable journey. You don't have to worry about every bump in the road; in fact the chances are you won't even notice them. The freedom provided by the surprisingly generous legroom adds to your comfort, especially on long journeys.

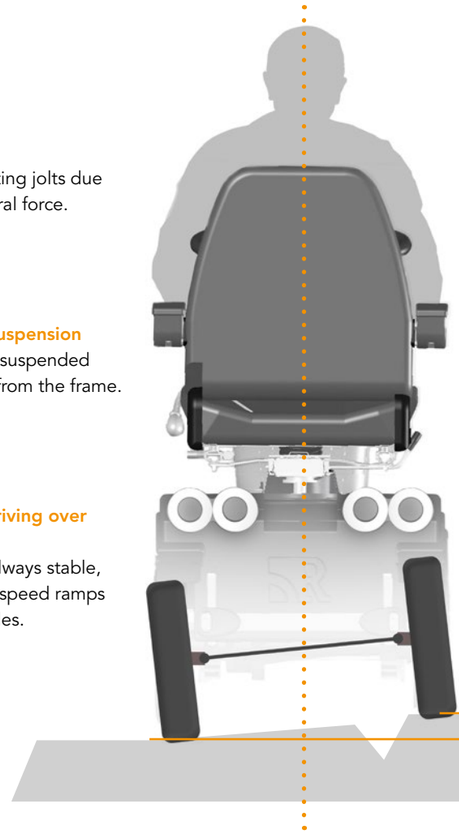
INDEGO suspension system

The human body was not made to withstand lateral forces. Our spine is able to move forwards and backwards; however, when it comes to lateral movements, we are a lot less flexible, so any jolting feels uncomfortable. To minimise the sideways forces on the body, our Solo, Presto and Presto S models feature the unique patented INDEGO suspension system. The Vivo has its own version whereby this suspension system is integrated at the front wheels.

The rubber-based INDEGO suspension system smoothly irons out any bumps in the road. This has an immediate cushioning effect, irrespective of the load exerted by the user. After all, with rubber there is no initial force to be overcome, which would be the case with spring suspension. This results in outstanding comfort, so you can focus all your attention on the traffic.

INDEGO



Stability
Minimises irritating jolts due to reduced lateral force.

Independent suspension
The wheels are suspended independently from the frame.

Safety when driving over obstacles
Road-holding always stable, even in case of speed ramps or other obstacles.

Driving comfort
A comfortable ride thanks to the natural absorption properties of the rubber suspension.

Straight spinal column
An upright posture despite bumps in the road.

Suitable for rough terrain
Also makes less accessible terrain easier to negotiate.
